

CIVIL ENGINEERING CONSTRUCTION MANAGEMENT

C101

Factors that influence multi-cultural team integration on construction project teams
E.G. Ochieng & A.D.F. Price

C104

Privileges and attractions for private sector involvement in PPP projects – a comparison between mainland china and the Hong Kong special administrative region
Albert P.C. Chan, Patrick T.I. Lam, Daniel W.M. Chan, Esther Cheung & Yongjian Ke

C105

Identification of key competences of design-build clients in the construction market of the people's republic of china (PRC)
Bo Xia, Albert & P. C. Chan

C106

Construction information technology and a new age of enlightenment
P. S Brandon

C107a

Knowledge management (KM): integrating past experiences
A. Weippert & S. Kajewski

C107b

Managing innovation-driven change: 'capitalizing on our most valuable and influential resource'
A. Weippert & S. Kajewski

C108

How to mitigate wind influence on motorways
A. Krecak Tomic & P. Sesar

C109

Precast concrete systems in developing vs. industrialized countries
G. Polat

C110

Life-cycle maintenance strategy development and decision-making model for street maintenance
A. Fastrich, & G. Girmscheid

C112

Green energy and indoor technologies for smart buildings
F. Vranay, Z. Vranayova, D. Ocipova & D. Lukasik

C113a

Building environmental assessment tool
S. Vilčeková, E. Krídlová Burdová & I. Šenitková

C113b

Indoor air quality, distribution systems, energy simulations
R. Nagy & I. Šenitková

C114a

Building passive design and hotel energy efficiency
B. Su & Q. Wang

C114b

Energy consumption related to winter housing thermal performance
B. Su

C116

Success factors of strategic system service oriented cooperations – lessons for the construction industry
D. Lunze & G. Girmscheid

C123

Prototype software for choosing appropriate type, size, number and time allocation of heavy equipment fleet in earthmoving projects
Ehsan Forsatkar, Ali A. Jalalzadeh & Pooya A. Naderi

C127

Dey street tunnel project – the challenges of a design build project in a congested urban environment
M. Trabold

C128

Challenges of a substation and infrastructure upgrade in an urban downtown setting
M.L. Cochrane & C.D. Wagner

C130

How building information modeling has changed the MEP coordination process
T. M. Korman, L. Simonian & E. Speidel

C131

Influence of construction costs on schedule performance
J. A. Kuprenas

C132

Structural engineering and construction issues in the design of the Palmdale water reclamation plant expansion in Palmdale, Ca.

K. Monroe, J. Stanton, P. Wong & S. Maguin

C134b

Building information modeling (BIM): study of best practices and return-on-investment (roi) analysis

S. Azhar, S. Richter & R.U. Farooqui

C136

Personality types of civil engineers and their roles in team performance

Kamal Gautam & Amarjit Singh

C137

Technology projects and their impact on the engineering and construction process

Max M. Shoura

C138

CFRP liner quality control for repair of prestressed concrete cylinder pipe

A. Allan & H. Carr

C139

Structural sustainability of high performance buildings

Mir M. Ali & Philip G. Dimick

C141

Omproving the MEP coordination process through information sharing and establishing trust

T.M.Korman

C144b

A comparative study on the use of alternative dispute resolution (ADR) to resolve construction dispute

Sai On Cheung, Peter S.P. Wong & Peter Kennedy

C145

A research framework to improve construction safety in the repair, maintenance, minor alteration and addition (RMAA) sector

A.P.C. Chan, F.K.W. Wong, M.C.H. Yam, D.W.M. Chan, C.K.H. Hon, D. Dingsdag & H. Biggs

C148

Configuration, evaluation and selection tool (CET) for tunnel construction methods

B. Schaiter & G. Girmscheid

C149

PPP-risk identification and allocation model (PPP-RIA-model): the crucial success factor for public private partnerships

T. Pohle & G. Girmscheid

C150

Development of a decision-making model for requirements management in building construction

N. Krönert & G. Girmscheid

C151

Maintenance life cycle cost model – prediction of the life cycle costs of different maintenance strategies for drainage systems of infrastructures

T. Gamisch & G. Girmscheid

C152

Open building manufacture systems: a new era for collaboration?

M. D. Sharp & J.S. Goulding

C153

Gendered behavior: cultures in UK engineering and construction organizations

Barbara Bagilhole

C155a

Conservation projects management by the architectural digital photogrammetry and GIS

F. Navarro, A.L. Rodríguez, V. Ávila & C. Loch.

C156a

Underlying mechanisms of failure costs in construction

J. E. Avendano Castillo, S. H. Al-jibouri & J. I. M. Halman

C156b

An interactive model for reduction of failure costs: a process management approach

J. E. Avendano Castillo, S. H. Al-jibouri & J. I. M. Halman

C157

Behaviors of leadership in architectural offices in turkey

E. Kasapoğlu

C159b

A survey of the current I-build practices in the Taiwanese construction industry

H. J. Chien, J. R. Chang & H. W. Chien

C163

Use of analytical hierarchy process technique for delay claims in construction contracts

N.B. Chaphalkar & K.C. Iyer

C164

Active pier underpinning of Jin-Bin light rail bridge in Tianjin
Jianqing Bu, Ning Sun & Siyong Huang

C165

Macroeconomic costs within the life-cycle of bridges
T. Zinke, T. Wachholz & T. Ummenhofer

C166b

Materials waste minimization strategies in Nigerian construction projects: rate of use and their contributions.
O. J. Oladiran

C169

Fuzzy logic based diagnostic tool for management of timber bridges
S. Ranjith, S. Setunge, S Venkatesan & R. Gravina

C170a

Quantifying measurement of successful project performance – a project manager's perspective
R.U. Farooqui & S.M. Ahmed

C171

Rapid transport system is an important infrastructure for urbanization: a case study.
S. K. Das

C172a

Developing a document management model for resolving contract disputes for contractor
J.-B. Yang, & K.-M. Huang

C172b

Determining schedule delay causes for private participating public construction works under the build-operate-transfer model in Taiwan
J.-B. Yang & C.-C. Yang

C173

Forecasting low cost housing demand in urban area in Malaysia using artificial neural networks (ANN)
Noor Yasmin Bt Zainun, & Mahroo Eftekhari

C174

Value engineering and its applications in construction industry
V.S.S. Kumar, R Ramesh Reddy & Anu Leena Y.

C175

Construction of concrete embedded track, direct fixation track, ballasted track, low vibration track, and special track work

Kenneth H. Dunne, Kit Wong & Nick Slama

C176

An anatomy of speculative claims in construction

Hoi Yan Pang & Sai On Cheung

C177

Causes of delay in Iran construction projects

Ehsan Asnaashari, Andrew Knight & Alan Hurst

C178

Genetic algorithm-based multi-objective design model for reinforced concrete beams

A. Senouci & N. Al-Nuaimi

C179a

Tall building boom - now bust?

I. R. Skelton, D. Bouchlaghem & P. Demian

C180a

Business model: a two-dimensional cooperation network for successful market penetration with prefabricated concrete elements and systems

T. Rinas & G. Girmscheid

C180b

Formwork specific, process orientated geometrical-path-velocity-time- model (Gpvt-model)

M. Kersting & G. Girmscheid

C182

Organizational e-readiness in the built environment: people, process, technology

E.C.W. Lou & J.S. Goulding

C183

Designing the relationship between contractor and client to partnership

Konrad Spang

C185

Innovative precasting of 41-storey residential buildings in Hong Kong public housing

M.K.K. Cheung, S.C. Lam, K.C. Chung & S.W. Sham

C187

Trend analysis of cost performance for public work projects

Pramen P. Shrestha & Leslie Burns

C188

Designers' role in the shaping of innovative and adaptable building system – a preliminary study

T. O. Odeyale

C189

Construction productivity and production rates: developing countries

C.R. Guntuk & E. Koehn

C190

Builders' perceptions of the impact of procurement method on project quality

S. Saha & M. Hardie

C191

Smoothing methodology for time series data

F. Khosrowshahi

CIVIL ENGINEERING MATERIALS

M103

Influence of admixtures on performance of roller compacted concrete

P.Hafiz &A.R.Khaloo

M104

Textile reinforced concrete structures computational models and applications

W. Graf, M. Kaliske, A. Hoffmann, J.-U. Sickert & F. Steinigen

M105

Precast ferrocement barrel shell planks as low cost roof

S.F. Ahmad

M107

Properties of the nature-fiber cement boards for building-compartments

Y. W. Liu & H. H. Pan

M108

Suitability of some Ghanaian mineral admixtures for masonry mortar formulation

M. Bediako, E. Atiemo, S.K.Y Gawu & A.A Adjaotor

M109

Use of bamboo composites as structural members in building construction

T.H. Nguyen, T. Shehab & A. Nowroozi

M111

Microstructural transformations on quenched & tempered steel welds
Severino Missori

M112a

Moisture permeability and sorption-desorption isotherms of some porous building materials
R. Miniotaite

M112b

Climatic effects on building facades
R. Miniotaite

M113

Influence of rice husk ash on strength and durability of binary and ternary blended concrete
H.B. Mahmud, M.F.B.A Malik, N.B.A.A. Hamid & M.F.M. Zain

M114

Green materials to offset seismic and other natural disaster events
B.O. Russell

M115

Use of polystyrene as a construction material in thermal insulation of concrete structure
H.R. MagarPatil & B.S Kakare

M116

Theoretical analysis of tensile stresses in orthotropic specimens under diametral compression tests
H. Iwashita & T. Tsutsumi

M117

Ultra light-weight self consolidating concrete
M. Hubertova & R. Hela

M121

Experimental research on regional confined concrete columns under concentric and eccentric compression
X.M. Cao, J.C. Xiao, Z.H. Huang & T.J. Ren

M122a

Concrete deterioration under alternant action of carbonation and sulfate attack
R. Gao, Q. Li & S. Zhao

M123

Numerical simulation of fracture propagation of concrete on Meso-level
Wu Feng & Zhuo Jiashou

M125a

Flexural behavior of high strength stone dust concrete
V. Bhikshma, R. Kishore & Mr.N.H.M. Raju

M125b

Investigations on flexural behavior of high strength manufactured sand concrete
V. Bhikshma, R. Kishore & C.V. Raghu Pathi

M129

Estimation of marine salt behavior around the bridge section
E.Iwasaki & M.Nagai

M130

Effects of bamboo material on strength characteristics of calcium-based mortar
H. Kawamura, K.Hashimoto & A. Shimabukuro

M131

On characteristics of bamboo as structural materials
T. Tada, K. Hashimoto & A. Shimabukuro

M132

Research into the optimum level of rock-derived micro-fine particles in sand for concrete
T.Kaya & K.Hashimoto & H.Yamamoto

M133

Basic study on physical property for Calcium-solidification material and on Ca-based concrete
A. Shimabukuro & K.Hashimoto

M135

Strength, sorptivity and carbonation in blended OPC-GGBS, alkali activated slag, and fly ash based geopolymer concrete
A.A. Adam, T.C.K. Molyneaux, I. Patnaikuni & D.W. Law

M136

Effects of remediation and hauling on the air void stability of self-consolidating concrete
N. Ghafoori & M. Barfield

M137

Nested ANOVA model applied to evaluate variability of ready-mixed concrete production
C. Videla & C. Imbarack

M139

Experimental study on Young's modulus of new-material-mixed cementitious extrusion-molded materials
Tsugumichi Watanabe & Akiko Mori

M140

Strength property of concrete using the recycled aggregate and a high volume of fly ash as a part of the fine aggregate

Takahide Ishiyama, Koji Takasu & Yasunori Matsufuji

M141

Correlations between filler type and the self compacted concrete properties

M. Gheorghe, N. Saca & L. Radu

M142

Experimental study on dry-shrinkage of lightweight cement mortar with considerations on finish plastering conditions

Tsugumichi Watanabe & Akiko Mori

M143

Bond studies of hooked bar anchorages confined with steel fibers in normal strength concrete

B.S. Hamad & E.Y. Abou Haidar

M147

The non-local theories based on different types of weighted functions and its application

Qing Yang & Zhong-chang Wang

M148

A laboratory investigation to prove the roll of pozzolan in permeability of RCC and its important result on dam construction industry

R. Esmaeil Abadai & S. Shahrabi Farahani

M149

Investigation the effect of aggregate on the performance of permeable concrete

C. Lian & Y. Zhuge

M150

Early life freeze/thaw tests on concrete with varying types of fiber content.

A. E. Richardson & S Wilkinson.

M151

Evolution of Portland cement pervious concrete construction

J.T. Kevern & Leed AP

M152

Reinforcement corrosion and durability of concrete structures

A. Aritra Khan & B. Ashok Kumar Khan

M153

Studies on glass fiber reinforced concrete composites – strength and behaviour
B.L.P. Swami, A.K. Asthana & Urooj Masood

M154

Hemp – rediscovered building raw material
Filip Khestl

M155

Measurement of attenuation for photons and removal cross-section for neutrons in L M C
B.K.Prasad, Uttamasha Gupta, U. B. Choubey, Vipin Dev, Dimple Verma & M.K.Nayak

STRUCTURAL ENGINEERING

S103

Study on the seismic behaviour of cable-stayed bridge based on FEM model
Dongming Yan & Genda Chen

S105

Wood use in type I and II (noncombustible) construction
D.G. Bueche

S108

Sequential failure analysis of tension braced MRFs
Mehrddad Lotfollahi & Mohammad Mehdi Alinia

S109

Effect of infill walls in structural response of RC buildings
I. Idrizi, N. Idrizi, Z. Idrizi, S. Idrizi & I. Idrizi

S110

Performance based analysis of RBS steel frames
P. Alexa & Ioana Ladar

S111

Numerical study on strengthening composite bridges, compare between applying steel sheets and HM-CFRP strips
K. Narmashiri & M.Z. Jumaat

S112

Seismic behavior of RC framed buildings with soft ground story
K.M. Amanat & S. Haque

S114

Response of long concrete structures in plan in seismic active regions
A. Zerzour & F. Belabdelouahab

S115

The optimization of the industrial steel building
T. Žula & S. Kravanja

S116

The MINLP approach to structural synthesis
S. Kravanja

S120

Applicability of AASHTO LRFD live load distribution factors for nonstandard truck load
Yail J. Kim, Rusmir Tanovic & R. Gordon Wight

S121

Finite element analysis of wind induced buckling of steel tank
S. Borgersen

S122

Correlation between minimum building strength and the response modification factor
L.G. Daza

S125

Finite element analysis of link slabs for jointless bridge decks
A.R. Aleti, A. Saber, G. Li & W. Alaywan

S126

Nonlinear finite element analysis of unbonded post-tensioned concrete beams
U. Kim, P. R. Chakrabarti & J. H. Choi

S131

Identification of frequency dependency of quality factor in subsurface ground using vertical array records of earthquake motions
O. Tsuijihara

S132

Prefabricated planar structure of a multi-storey building exposed to cyclic load and engineering seismicity
J. Witzany, T. Čejka & R. Zigler

S137

Structural behaviour of reinforced palm kernel shell foamed concrete beams
U. Johnson Alengaram, Mohd Zamin Jumaat & Hilmi Mahmud

S141

Modeling the steps of structure failure in the seismic load
H.Fathi

S146

Relationship between strength of prefabricated scaffolds and shear rigidity of vertical and horizontal frames
H. Takahashi, K. Ohdo & S. Takanashi

S147a

Experimental investigation of FRP wrapped RC circular and square hollow columns
M.N.S. Hadi & Y. Kusumawardaningsih

S147b

Behaviour of frp wrapped circular reinforced concrete columns
M.N.S. Hadi & V. Yazici

S148

Practical non-prismatic stiffness matrix for haunched-rafter pitched-roof steel portal frames
H. K. Issa & F. A. Mohammad

S150

Structural behavior of steel frame connections subjected to blast
G.S. Urgessa & T. Arciszewski

S151

Adaptive behavior of double concave friction pendulum bearing and its advantageous over friction pendulum systems
M.Malekzadeh & T.Taghikany

S152

Estimation of statically equivalent seismic forces of single layer reticular domes
H. Abdolpour, Z. Zamanzadeh & A. Behravesht

S155a

Three-dimensional displacement computation and construction pre-control of foundation pit in Deping Station of Shanghai Track Traffic Line 6 project
Youliang Chen, Zhenzhen Yin, Junhua Wu & Ming Wang

S155b

Experimental research on high-frequency fatigue behavior of concrete
Youliang Chen, Wei Shao, Hongjuan Han, Rafiq Azzam & Zhenzhen Yin

S156

Torsional resistance of confined brick masonry panel
Pramod Kumar Singh

S157

Innovative tool for predicting slab deflections at conceptual stage of design
Vinay Agrawal, Ravindra Nagar & Vinay Chandwani

S158a

Crack arrest strip-saturation model for a cracked piezoelectric strip
R. R. Bhargava & Amit Setia

S159

Strengths of unconfined and confined brick masonry buildings under seismic load
Pramod Kumar Singh

S160

Soil structure interaction analysis of plane frames using fem
Dr. Harpal Singh

S161

A note on the model based on the constant Q damping assumption and its corrected models
A.Susumu Takahashi

S162

Experimental study for development self-centering RC structural frames with column yielding mechanism
K. Sakino & H. Nakahara

S163

A study on a neural-oscillator model for human-induced lateral vibration on congested footbridge
M.Yoneda

S164

Calculation method research on the flexural capacity of prestressed steel reinforced concrete beam
A. Qin Shihong, B. Wang Yuan, Li Feng & C. Ding Zhichao

S165

Comparison of seismic safety of steel MRF designed according to different editions of Iranian seismic code
K. Nasseradi

S167

Mitigation of high acceleration shock waves in hybrid structures
S.G. Ladkany & S. Sueki

S169a

Elastic-plastic bending load-carrying capacity of steel members
P. Juhás

S169b

Experimental research of local elastic-plastic stability and load-carrying capacity of thin-walled steel members subjected to compression

P. Juhás, M. Al Ali & Z. Kokorud'ová

S170

Strengthening a concrete slab bridge using CFRP composites

S. H. Petro, J. T. Peaslee & T. G. Leech

S171

Modeling of concrete beams prestressed with aramid fiber reinforced polymer (AFRP) tendons

Yail J. Kim

S172

Contribution of NSM CFRP bars in shear strengthening of concrete members

AKM Anwarul Islam

S173

Effect of shear lug on anchor bolt tension in a column base plate

P.K. Khan

S174

Repair systems for two-way and one-way un-bonded post-tensioned slabs with composite materials

P.R. Chakrabarti, U. Kim, Mark Busciano & Vin Dao

S176

A new composite layered plate element for nonlinear analysis of FRP-reinforced concrete slabs

Y.X. Zhang & Y. Zhu

S177

Experimental study of reinforced concrete slab – CFT column connections resisting seismic deformations

Youpo Su & Ying Tian

S178

An experimental study on double steel-concrete composite beam specimens

S.J.Duan, Q.D.Zhou & J.W.Wang

S180b

Tensile-anchorage bearing modes and structural details of annular high-performance prestressed concrete structures

F. Li & S. Zhao

S181

Ultimate strength of stiffened composite plates under inplane and out-of-plane loading
Rahima Shabeen. S & Alagusundaramoorthy. P

S184

Strengthening effect of consolidated carbon fiber plate (CCFP) for RC member under negative bending

I. Yoshitake, K. Yumikura, Y. Mimura & S. Hamada

S185

Behavior of cylindrical R/C panel under combined axial and lateral load

T. Hara

S186

Shear strength and deformation prediction in steel fiber reinforced concrete beams without stirrups

T. Nyomboi & H. Matsuda

S187

Punching shear strength of RC slabs using lightweight concrete

H. Higashiyama, M. Mizukoshi & S. Matsui

S188

Shear crack width of reinforced concrete column with cut-off reinforcement subjected to reversed cyclic loading

T. Tsubaki, M. Dragoi & J. Onishi

S189

Experimental study on high strength R/C member subjected to axial tensile force and shear
Takahiro Tamura

S190

Investigating the buckling behaviour of single layer dome form of space structures

Z. Zamanzadeh, H. Abdolpour & A. Behraves

S191

integrated design and construction to mitigate wind-induced motions of tall buildings

K. Moon

S193

Full scale test on a bridge PC box girder

C. Mircea, A. Ioani & Z. Kiss

S194a

Evaluating shear capacity of interior beam-column joints subjected to cyclic loading using neural networks

A. Said & E. Khalifa

S194c

Comparison of different standards for progressive collapse evaluation procedures at various seismic conditions

A. Saad, A. Said & Y. Tian

S198

a study of the evolution of steel-concrete adherence capacity under dynamic fatigue processes

M. A. Vicente, D. C. González & J. A. Martínez

S199b

Seismic Hazard Assessment of Bandar Abbas for Seismic Retrofitting

G. Ghodrati Amiri, S.A. Razavian Amrei & B. Mohebi

S199c

Deterioration effect in reinforced concrete moment frames in pushover analysis

G. Ghodrati Amiri, B. Mohebi & S.A. Razavian Amrei

S199d

Evaluation of drift distribution in performance-based retrofitting reinforced concrete frames using steel bracing

G. Ghodrati Amiri & A. Gholamrezatabar

S199e

Effect of transverse reinforcing on circular columns confined with FRP

Gh. Ghodrati Amiri, A. Jaber Jahromi & B. Mohebi

S200

Non-deterministic modeling of a cable-stayed bridge with multiple uncertainties

R. Ramesh Reddy, M.V.Rama Rao & V.S.S.Kumar

S202

Shape optimization of shell structures with variable thickness

M. Kegl, B. Brank & D. Dinevski

S205

Reasoning on structural timber design for target reliability

L. Ozola

S206

A finite element model for double composite beam

D. Shujin, N. Runming, J. XU & H. Zheng

S207a

Application of nonlinear damper in reinforced concrete structure control
F. Hejazi, J. Noorzaei & M. S. Jaafar

S207b

Seismic analysis of interlocking block in wall – foundation – soil system
M. S. Jaafar, F. Hejazi, A. A. Abang Ali & J. Noorzaei

S209

Estimate & processing of earthquake damages by optical satellite images
M. H. M. Tabrizi

S210

Long-term deflections of long-span bridges
J. Navrátil & M. Zich

S211

Behavior of fiber reinforced concrete beams on grade subject to cyclic loading
M.A. Briggs & A.J. Valsangkar

S212a

Mitigation of seismic effects: addition of viscous dampers between adjacent structures
S. Silvestri, G. Gasparini & T. Trombetti

S213

Investigations of the dynamic state of turbo sets foundations
A.O. Kolesnikov, V.N. Popov & O.M. Kolesnikov

S214

Study up nonlinearity in the data from transient load identification
Y.G.Wang

S215

Analysis of Large Dynamic Structures in the Entertainment Industry
D. P. Cook & R. T. Robinson

S218

A revised BESO method for topology optimization of structures with design-dependent gravity loads
X. Huang & Y.M. Xie

GEOTECHNICAL AND FOUNDATION ENGINEERING

G102

Model tests on bearing capacity of soil-bags
H. Yamamoto & S. Jin

G104

Large scale experimentation slope stability of «Soil Tyre »
F. Belabdelouahab & A. Zerzour

G105

Estimating rock mass properties and adapting tunnel support from in situ measurements during tunneling construction
Ioannis Z Spyropoulos

G106

Bearing capacity factor for cohesion-less sand or rock
R. V. Jarquio

G107

Dynamic effects of machines on foundations buildings
J. Vondrich & E. Thöndel

OTHERS ENGINEERING

O103

The risk notion to transcend the real estate management complexity
F. Taillandier, R. Bonetto & G. Sauce

O109

Load testing a historic monument
F. D. Heidbrink
